PPA5/15 Series Rack Mounting System

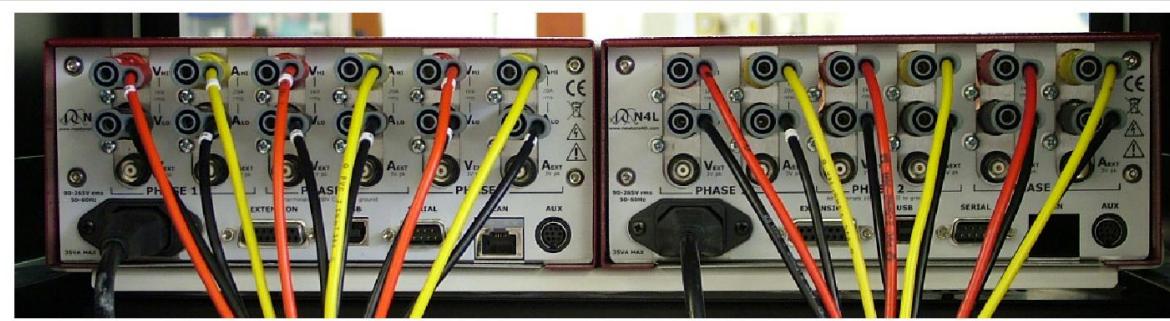

The PPA5/15 series Precision Power Analyzers are becoming a popular instrument choice in Power Analysis Test Rig Systems. In response, the PPA5/15 Rack Mounting System has been designed with adaptability in mind. The system has four configurations and is constructed with high strength 2mm steel to fully support two instruments in a 2U rack height.

Four different configurations are available. Left, Middle, Right and Twin instrument mounting

Below depicts the Twin Instrument configuration giving a convenient Six-Phase solution

*Ensure 15mm clearance to air vents on underside of instrument
 **Max 40 deg C ambient temperature clean air supply
